RESTORATIVE
CLADDING CLEANING
PRODUCTS

ABOUT US

We supply high quality metal façade, cladding cleaning and cladding restoration products to commercial and high-end residential cleaning companies. All our products are manufactured to high quality specification. Our products can be used on the following cladding cleaning and cladding restoration projects:

- Stainless steel surface ✓
- Anodised aluminium surface ✓
- Polyester powder coated surface ✓
- uPVC/GRP surface ✓

Specialist Building Cleaning Products are ideal for cleaning and restoration of metal façade panels and window frames. Our techniques and systems are designed for dilapidation and maintenance cleaning projects. The effectiveness of our products depends on the location of the building, a restorative clean can last around 48 months after restoration. If you are a Building Surveyor and are considering specifying a restorative clean to your project, please contact us.

If you are looking to protect your metal façade or cladding with a life expectancy of at least 20 years please visit WWW.QUALIPROTEC.UK.COM

PRODUCTS

Super Wax Polish Blue Cleaner

Developed for the cleaning and preservation of surfaces, such as powder-coated and varnished metal façades, doors and window frames.

Wash Preservative

Developed for the cleaning and preservation of anodised and coated metal surfaces. This product contains surfactants, which help remove stubborn contaminants.

Stainless Steel Surface Preservative

Developed for the cleaning and preservation of stainless steel surfaces. Stainless Steel Restorer removes dirt deposits through the especially added grease solvent and cleaning intensifier.

Brilliance Polish Cleaner

This 2-1 Polish Cleaner is an ideal product to use with 3M Scotch Brite. It can be used on powder coated surfaces, although Brilliance Polish Cleaner has been developed for plastisol surfaces.

Anodised Basic Cleaner

Developed for the removal of stubborn contaminants on anodised aluminium. Through its solvents (terpenes and abrasives), it removes strong oil, grease, rust and pigment contamination.

Anodised Preservative

Developed for the protection of cleaned anodised or coated metal surfaces. Anodised Preservative creates a temporarily weather and UV resistant protective film.
